

# TechCorp IAM Platform Implementation Plan

- Objective: Implement a scalable IAM platform supporting security, efficiency and digital transformation.
- Scope:
  - User Lifecycle Management
  - Access Control
  - SSO, MFA, PAM
  - Cloud & Legacy Integration

# Implementation Roadmap

- Phase 1: Initiation
- Phase 2: Assessment & Planning
- Phase 3: Solution Design
  
- Milestones:
  - • Project Charter
  - • Requirements Sign-off
  - • Design Approval

# Resource Planning

- Personnel:
  - • Project Manager
  - • IAM Developers
  - • Security Architects
  - • Cloud Engineers
- Technologies:
  - • Entra ID
  - • SailPoint/Saviynt

# IAM Platform Implementation

- • Configure IAM Platform
- • Integrate Active Directory
- • Deploy SSO and MFA
- • Implement RBAC
- • Configure PAM
- • Enable Provisioning Workflows

# Integration Strategy

- Legacy Systems:
  - Federation
  - Directory Sync
- Third-Party Apps:
  - OAuth 2.0
  - SAML
  - OpenID Connect

# Testing & Quality Assurance

- • Authentication Testing
- • Authorization Testing
- • Security Testing
- • Integration Testing
- • User Acceptance Testing

# Deployment & Optimization

- • Pilot Rollout
- • Department Rollout
- • Global Deployment
- Monitoring:
  - • Access Reviews
  - • Security Alerts
  - • Compliance Reporting

# Business Benefits

- • Stronger Cybersecurity
- • Reduced Unauthorized Access
- • Faster Onboarding/Offboarding
- • Improved User Experience
- • Support for Digital Transformation
